AA
 Strong economic structure and policy framework (industrialised economy or similar). Negligible risk of external liquidity crisis. Generally sound business environment. Negligible risk of political instability. Strong capacity to respond to economic crisis.

A
 Economic structure and policy framework generally adequate. Very low risk of external liquidity crisis. Generally sound business environment. Negligible risk of political instability. Good capacity to respond to economic crisis.

BB
 Some signs of structural and policy weaknesses. External liquidity adequate, some weaknesses in business environment and/or significant, though moderate, risk of political instability and adequate capacity to respond to economic crisis.

B
 A range of structural and policy weaknesses and/or vulnerable external liquidity position, some weaknesses in business environment and/or serious weaknesses in political framework with higher risk of political instability and limited capacity to respond to economic crisis.

C
 Deep structural weaknesses and/or strong policy measures required and/or external liquidity risk is high, serious weaknesses in business environment and/or serious weaknesses in political framework with higher risk of political instability and little capacity to respond to economic crisis.

D
 Structurally very weak and policy ineffective and/or current/imminent external liquidity crisis, serious weakness in business environment and/or actual or very high risk of political instability. No capacity to respond to economic crisis.

N.B.: The country rating is an evaluation of the risk of payment default for short-term business in a specific country due to political and/or economic factors. Country ratings are subject to modification. The ratings always refer to the date given in connection with the country concerned.
